

Class: Otter / Yr1 & 2
Autumn term 2025

Broughton Bitesize

What your children are learning this term.

Computing

'Data handling'. This unit helps children understand how data can be used to answer questions and make comparisons, building essential skills for interpreting information in everyday life.

UN article 16: Protection of privacy

PE

In PE next term, we'll be starting a gymnastics unit. This will build physical skills, spatial awareness, and teamwork in a safe and supportive environment.

UN article 24: Health

RE

'Journeys and the Nativity' helps children explore the idea of special journeys, both in everyday life and within religious stories. We will learn about the journey Mary and Joseph took to Bethlehem and the significance of the Nativity story in the Christian faith.

UN article 13: Sharing thoughts freely

Maths

We'll be introducing children to the concepts of grouping, sharing, and repeated addition. We will learn to solve simple problems using practical resources, arrays, and number lines to build a strong foundation. We will begin to understand multiplication as "lots of" and division as "sharing equally," developing their fluency with numbers. This supports logical thinking and helps children build confidence in applying their skills to real-life situations.

UN article 28: Right to education

Geography

'My Local Park'. The children will explore the features of a park and learn about what makes it an important part of our community. We will look at human and physical features, such as benches, paths, trees and ponds, and think about how people use the park in different ways.

UN article 28: Right to education

English

Next term, we'll be diving into book *Big Bear, Little Brother where* children will explore the themes of friendship, bravery, and kindness through this heart-warming story. We will develop our comprehension skills by discussing characters' feelings and actions, and use this understanding to write a diary entry from the perspective of one of the characters.

UN article 28: Right to education

Science

'Floating and sinking' introduces children to basic properties of materials through hands-on exploration. Pupils investigate which objects float or sink in water and begin to understand how shape, size, and material can affect this. Through predicting, testing, and observing, they develop early scientific skills and learn to record their findings.

UN article 28: Right to education

Music

Through singing, playing instruments, and listening activities, pupils will learn to recognise, explore, and compare different pitches.

UN article 29: Aims of education

DT

We will learn to identify, name, and describe different fruits and vegetables, exploring their taste, texture, and appearance. We will also develop basic food preparation skills such as cutting, peeling, and assembling.

UN article 29: Aims of education

PSHE (Scarf)

We will explore personal strengths, goal setting, and the value of trying our best in all we do. Through discussions and activities, we will build confidence, resilience, and a sense of responsibility for our own well-being.

UN article 3: Best interests of the child.
